Icom's new entry into license free radio!

Building on the heritage of commercial, amateur and marine, Icom releases the perfect radio for recreational and small business use, the IC-U20GM.

Features Include:

Compact Size and rugged MIL-STD810G design with IP54 water and dust resistance made for outdoor adventures. Made in Japan quality you've come to expect from Icom unlike other radios.

User-friendly operation with intuitive front panel, large display and voice guide when switching channels
Two programmable function keys

True 1 W output power, 22 channels with CTCSS and DTCS coded squelch

Up to 19 full hours of operation with its user replaceable 2350mAh battery, 5 hours charge with the included desktop charger USB-C charging direct connection on-the-go so the adventures keep on going.

Supports optional headsets and earphone microphones including the MH-1LS-OW, HM-2LS-OW, and HM-3LS-OW.

Supplied Accessories: Radio, BP-304A Battery Pack, MB127 Belt Clip, BC-262 Charging Cradle, BC-263A USB C AC Adapter

Icom's latest D-STAR Dual Band Portable Radio

Dual Band Coverage: 2m/70cm TX, RX (A-band) 108~174, 375~479 MHz, (B-band) 137~174, 375~479MHz, FM Broadcast 88-108MHz.

Internet Gateway Function: Access the D-STAR network virtually anywhere by connecting the ID-50A to a PC or an Android™ device connected to the internet.

Easy D-STAR Settings: The DR function now makes communications using D-STAR repeaters easy. Just select "FROM" (*access repeater*) and "TO" (*destination*), and you'll be making QSO calls including Local Area, Gateway, and Simplex calls.

Share Picture Function: You can share pictures with others in the DV mode. Edit and share photos on your Android™ device with the picture utility app.

Band Scope Function: Easily Find Active Channels with the waterfall display to find active channels or an open frequency.

High Contrast Monochrome LCD Display: Easily viewable in direct sunlight

IPX7 Waterproof Construction: Built for outdoor activities and harsh environments.

VHF AM Air band and FM Broadcast Receiver

Various Data Saving on a MicroSD Card of up to 32 GB can store QSOs, TX Voice Memory, pictures, and logged GPS data.

\$624.95

Getting your home or cabin on the air:

VHF and UHF Radios:

Q. Which one do I buy??

- A-1. If you hold an amateur radio license and intend to use the radio **only** on amateur frequencies, you purchase an amateur radio. If you hold an amateur radio license and intend to use the radio on both amateur and commercial frequencies, you would look at the radios designated Commercial as these have the necessary approvals for either use. Commercial radios must be licensed for use on the commercial channels you intend to use.
- A-2. If you **DO NOT** hold an amateur radio license, you can purchase, license and use any radio with commercial designation. These radios will be supplied with the channels you are granted on your commercial license (examples: RR and LAD channels). There is no exam or studying for a commercial license.

What you need: A power supply, antenna, cable*, connectors* and a radio.

Power Supplies: Converts household 120 VAC power to 12V DC to run your radio.

ICT - The Power of Reliability - Made in Canada!

Enter a New Era of Wide Area Radio Communications

Talk Listen
Simultaneous

CONNECT Coverage

CONNECT uses (4G) networks in the US and Canada.

Harness the power of LTE for the ultimate nation-wide two-way radio platform only from Icom CONNECT

Traditional radio systems only cover a city, or a limited region. Icom's IP Advanced Radio System mates the coverage power of LTE networks with a familiar radio user interface. Nation-wide or international coverage provides the ultimate fleet dispatch tool, or connect instantly and securely with branch offices, field technicians, and management no matter where they may roam. Digital encryption keeps your communications secure and free from eavesdropping. Individual PTT, Group PTT Call or Individual 1:1 full duplex calling provides unparalleled flexibility. Experience LTE's superior in-building coverage compared to traditional trunking and wide area two way radio services.

Features Include:

- Ultra compact size and smart rugged design with IP67 water and dust resistance.
- User-friendly operation with intuitive front panel, large graphical transfective display
- Individual, group, talkgroup, multiplex talkgroup, and all calls
- Priority Interrupt allows emergency calls to be made despite other calls being active.
- Emergency button, Lone Worker, and Man Down functions
- Vibration alert function notifies of an incoming call
- Text message reception and pre-programmed message transmission
- Superior very high quality and secure communications with G.726 vocoder.
- Up to 500 memory address book (including individual, group, talkgroup and telephone lists)
- Voice message recording
- Up to 10 full hours of operation with its high capacity LiION battery, rapid charge with the included desktop charger.
- Uses the same user swappable battery packs as regular radios to keep radios in use in multiple or extended shifts.
- Supports optional accessories such as headsets and speaker microphones

Supplied Accessories: Radio, LiION Battery Pack, Belt Clip, Rapid-Rate Desktop Charger, AC Adapter

Airtime: Low cost Canada-wide unlimited airtime packages start at just \$29.95 per month. International airtime plans are available.

*Limited Time Special
Until December 31*

\$249.95

- Amateur mode can be enabled for use on Amateur Bands
- USB Programming Cable and Belt Clip -Free Programming Software Online
- IP54 Construction resists dust and moisture

**Ideal Digital Upgrade
for a DJ-500T**

-Retains compatibility with all accessories from the DJ-500T, DJ-MD5XTG and earlier generation radios.

\$249.95

Icom's newest analog dual band portable! *Made for the elements of the great outdoors!*

Sharing the same platform as Icom's commercial VHF IC-F1000 and IC-A16 airband radio, and an IP54+ MIL-STD waterproof rating, the IC-T10 packs simple yet powerful features in a dual-band amateur handheld. It's ready for whatever field activities lie ahead. Clearly hear received traffic or the FM radio receiver with highest audio power.

High 5W of power on both 2m VHF and 70cm UHF. Wideband 136-174 and 400-479MHz receive to monitor the action. Large 200 channel capacity with 3 pairs of scan-edge (search) memories. Direct conversion receiver eliminates IF stages and provides the maximum receiver performance.

Outdoor Sports and Disaster Ready - the IC-T10 is an excellent fit for any emergency kit or hunting trip with its rugged build. The IC-T10 tested and passed MIL-STD 810 C, D, E, F, & G environmental tests. The IP67 dust-tight and waterproof rating make the handheld ready to take on whatever is thrown its way.

Loud audio thanks to a combination of a new speaker design and a 1500 mW audio amplifier.

Capable of monitoring local FM and weather channels is necessary for those who like to stay prepared. The IC-T10 is pre-programmed with NOAA weather alert channels for additional safety.

With the power save function and high capacity LiON battery, get up to **11 hours of operating time** -enough for a full-day of adventures..

\$324.⁹⁵

Tell me about my portable radio's range?

A radio's range and performance is based on both the radio, and the efficiency of the antenna it's connected to, in addition to the terrain between radios. With a portable radio, the design and efficiency of the antenna is of the utmost importance. This is due to a portable radio's low transmit power and the physical size constraints of the antenna which puts the system at a disadvantage to mobile radios with outside antennas.

So, what do I need to do to get better range?

Fortunately there are antennas specially designed to get the most out of a portable radio. With the right antenna, the improvement can be dramatic -especially when moving from a factory antenna which is made as a compromise between size, frequency coverage, and cost. Smiley Antenna designs efficient antennas with better performance, MIL-SPEC durability -used on the battlefield by armed forces throughout the world, and at a reasonable cost. Plus their antennas are made in the USA!

Smiley Slim Duck antennas feature 6dB of gain which equates to 4x increase of the signal to the air. This improves both reception and transmission. They build antennas tuned to specific bands in order to further benefit performance. The Stubby Duck antenna provides 3dB of gain, which equates to 1.5x the signal.

Exclusive interchangeable System 1 connectors allow Smiley antennas to easily connect all popular radio makes and models.

Each antenna includes your choice of connector to fit your radio.

Can your antenna do this?

Popular System 1 Connectors for Portable Radios:

(Clockwise)

SMA-M, SMA-F, MX, BNC-M

VHF 6dB Slim Duck
\$38.95
Includes System 1 Adapter

5/8 Wave design for high gain and 10MHz overall coverage. Only ~12" long for VHF, 5.5" for UHF

UHF 6dB Slim Duck
\$38.95
Includes System 1 Adapter

Durable internal elements ensure long service life

UHF 3dB Stubby Duck
\$37.95
Includes System 1 Adapter

NT-MIL Space-age synthetic coating for maximum durability

System 1 connector allows connection to radios regardless of connector needed.

If you don't see what you need or have a special requirement, Just give us a call as we likely have it in stock!

New Uniden CB Portable Radio Package

Now with new FM mode for improved communication performance

**External Magnetic
and
Mobile Antennas
Available**

**Adventure Ready:
3-Way Multi-Use: Handheld,
Vehicle, or ATV!**

Ideal for Adventures in the USA:

Everything needed to setup in your motor home, car, light truck, ATV or on a hike. Includes flexible portable antenna, AA dry cell battery pack, rechargeable battery pack, 12V DC battery eliminator. Heavy duty commercial design built for the most demanding adventures – *not a cheap plastic toy!*

****NO LICENSING REQUIRED**
FOR USE IN EITHER CANADA OR THE USA!**

- Large dual-color backlit easy-to-read display.
- 40 Channels with AM and new FM mode.
- Dash hanger for quick easy vehicle mounting
- Compact size fits virtually every vehicle.
- Vehicle DC battery eliminator makes the radio easily moved from vehicle to vehicle with ease. External antenna connection on the eliminator allows maximum range with a minimum of connections – slide the radio onto the eliminator and you're on the air.

What and why FM Mode?

Long the mode of choice on amateur, commercial and marine bands, FM is now available on CB in order to provide the ultimate in range and clarity. Provides the benefit of filtering off the distracting nonsense from “skip shooters” and providing communications akin to VHF and UHF radios.

New Uniden AM and FM High Performance CB Radio

****NO LICENSING** REQUIRED
FOR USE IN EITHER CANADA
OR THE USA!**

**External Magnetic
&
Mobile Antennas
Available**

What and why FM Mode?

Long the mode of choice on amateur, commercial and marine bands, FM is now available on CB in order to provide the ultimate in range and clarity. Provides the benefit of filtering off the distracting nonsense from "skip shooters" and providing communications akin to VHF and UHF radios.

High Performance CB Radio:

The Uniden PC78LTXFM is the new dual-mode AM/FM transmit and receive CB Radio from Uniden. The performance enhancement features include an integrated SWR Antenna Calibration system that allows the user to calibrate the vehicle's antenna system for optimum receive and transmit performance. Additional features include Antenna Warning LED, RF Gain and Mic Gain, Hi Cut Noise reduction, Automatic Noise Limiter, and a PA System.

NEW DESIGN - CLASSIC QUALITY- Departing from radios built before, now features microprocessor control and high quality surface mount construction on heavy duty circuit boards. Trucker quality cast face and knobs means "a radio built to take it"

DUAL AM/FM MODE - This CB radio provides access to both AM and FM channels, allowing clear reception, strong transmissions, and long range.

INTEGRATED SWR ANTENNA CALIBRATION -Built-in SWR meter to precisely tune your antenna for best signal.

BRIGHT LED CHANNEL INDICATOR - Bright LED channel indicator, front panel Mic connector, and Uniden's classic controls with an enhanced channel selector that offers more positive channel selection and reduced drift.

HIGH-CUT AUDIO - Cuts out the high frequency interference for clear receive.

RF GAIN & MIC GAIN - Adjusts receiver sensitivity for better reception and microphone sensitivity for 100% modulation.

AUTOMATIC NOISE LIMITER / NOISE BLANKER - ANL reduces external noise and NB reduces interference from the vehicle's ignition system.

Our Ordering Process:

***Take advantage of our new streamlined ordering process.
Secure, safe, easy and fast. Local or out of town.***

1. *Select the items you want. Need help choosing the right radio or accessories? Call us.*
2. *Email your confirmed order to sales@rhecomm.com with your name, shipping method, address and contact details. If you're a licensed amateur please ensure you include your call sign. If you do not specify a preferred shipping method, we will choose among the most economical in your order confirmation.*
3. *We will calculate your order with taxes and shipping, and send you an order confirmation email of the total amount.*
4. *Using Interac e-Transfer you send your payment to sales@rhecomm.com
To protect our customers from fraud and scams, we DO NOT take credit cards over the phone.*
5. *Once payment is received and cleared, we'll ship your order and provide you with a tracking number.*
6. *When your items arrive, you're on the air.*

From Vancouver:

- Take HWY 99 **south** through Richmond to the Steveston Hwy Exit. (Exit 32)
- Follow Steveston Hwy **west** to No.5 Rd. and turn **left**.
- Turn **right** onto Horseshoe Way and follow it until you have to stop at the  sign.
- We're on the **left (south)** side of the intersection.
- Ample parking and entrance at rear** of building.

Simple Fine Print: Important *Please read*

-All prices in **Canadian Dollars** & exclude applicable BC PST and GST -All items FOB our shop in Richmond BC **-Closeouts, last call, and specials are while stock lasts** -Special order/non-stocked items require payment at time of order. -All sales final: no exceptions - even if your wife goes nuts after you bought a new rig. -We do not accept ICBC claims, however you can take your paid invoice to them for reimbursement. -All radio products are marked with a tamper evident seal at time of purchase and warranties are void if seal is violated. Commercial radios and digital scanning receivers must be licensed unless they are operated on the amateur bands by licensed amateurs. Products programmed are licensed at time of purchase.
